

# Did You Know?

- For the first time in Kentucky, vulnerable adult service providers and individuals authorized under KRS 209.032 will be required to query the Cabinet for Health and Family Services (CHFS) as to whether a validated substantiated finding of adult abuse, neglect or exploitation has been entered against an individual in an APS investigation.
- The DCBS new Adult Protective Services (APS) Caregiver Misconduct Registry requires an exact match on a perpetrator's Social Security number to yield a result.
- Staff should make every effort to obtain accurate Social Security numbers for all individuals in a case including the APS perpetrator or perpetrators and to document this information in the appropriate i-Twist screens as it is directly linked to the efficacy of the registry and to the preservation of the health, safety and well-being of vulnerable adults.
- For additional information about the Caregiver Misconduct Registry, please refer to cited changes in SOP listed in [PPTL 14-10](#) and on the [DCBS home page](#).
